Applied Radiation and Isotopes 54 (2001) XI–XXII

Applied Radiation and Isotopes

www.elsevier.com/locate/apradiso

SUBJECT INDEX VOLUME 51

Accelerator
Cyclone 3D ^{15}O generator: use in gas production for PET and quality assurance 403
Accelerator mass spectrometry see Spectrometry, mass accelerator
Accident
Chernobyl: spatial variability of ^{137}Cs in small agricultural drainage basin in central Russia 341
Nuclear: detection limits for ^{90}Sr, Pu, Am and Cm in soil and vegetation 229
Actinium
Separation from natural U and Th series by ion exchange 493
Activation analysis
Charged particle: use to determine oxygen impurity atoms beneath the surface of Cz-silicon 533
INAA: use to determine natural radioactivity in building materials in Rawalpindi/Islamabad 559
NAA
Re-evaluation of k_o for ^{104m}Rh-^{104}Rh 555.8 keV γ-ray 701
Use to determine heavy metals and rare earths in Egyptian cigarettes 131
Use to determine ^{129}I in radwastes 137
PGNAA
NaI detector non-linearity 189
Use to determine the Ca/Si ratio in bulk concrete 9
Air
Borne low level contamination: new technique for processing γ-ray spectrometry data 651
^{129}I: determination by accelerator mass spectrometry 315
^{210}Pb concentration at ground level;: use of γ-ray spectrometry 239
Alanine
Free radicals: resolution enhancement of broadened spectra 663
Unbound and silicone bound, γ-ray and UV irradiated: resolution enhanced ESR powder spectrum 675
Algorithm
For projection map interpolation in parallel beam γ-ray computed tomography 717
ALICE
Code predictions on accelerator production of ^{99}Mo 177
Aluminium
Scatter fraction of x-ray beam: determination by experiment and Monte Carlo calculation 161
Americium
Detection limits in soil and vegetation shortly after a nuclear accident 229
Amino acids
^{11}C labelling: synthesis using immobilised enzymes 285
Amino methylene phosphonate derivatives
Labelling with generator produced ^{188}Re and stability 307

* Denotes a Technical Note.

PII: S0969-8043(99)00266-3

Ammonia
$[^{13}N]NH_3$: improved yield from proton irradiation of water using methane gas 395
Apparatus
Automated synthesis module for one-pot preparation of 6-[^{18}F] fluoro-DOPA 389
Ash
Coal: influence of Fe content on measurements of calorific value 419

Bacteria
E. coli: effect of ^{99m}Tc labelling on viability 33
Barium
Ba(II) ions: removal from aqueous solutions by hydrous ferric oxide 359
Beryllium
^{7}Be fallout: as a tracer in soil erosion investigations 599
Beta particle
Emitter mixture: technique using liquid and NaI(Tl) scintillation spectrometry 429
Mass attenuation coefficients of $\beta+$ particles 217
Bismuth
^{207}Bi activity calibrated source: use in HPGe detector efficiency calibration 323
Blood
Red cell labelling with ^{99m}Tc: effect of *Peumus boldus* 145
Body burden
Of radiocesium in man by urine excretion: differences between potassium and creatinine normalisation 505
Bone
Radius: *in vivo* measurement of Ca/P ratio by x-ray absorptiometry 273
Book review
What is safe? The risks of living in a nuclear age 757
Borehole
Logging: optimisation of spectrometric γ-γ probe configuration for lead and zinc grade determination 449
Brachytherapy
Rhenium wire source: ^{186}Re and ^{188}Re distribution and its effect on β-dosimetry 543
Brine
Concentrated: spectroscopic investigation of hypochlorite formation by α-radiolysis 637
Bromine
^{81}Br(n,2n)^{80m,g}Br reaction: measurement of isomeric cross sections using 14.5 MeV neutrons 81
3-Bromopropyl triflate
Re-evaluation as the precursor in the preparation of 3-[^{18}F]-fluoropropyl bromide 293
Building
Materials
Indian: natural radioactivity 93
Measurement of U,Th and K concentrations 483
Used in Rawalpindi/Islamabad: determination of natural radioactivity 559

Calcium
Ca/P ratio in radius: *in vivo* measurements by x-ray absorptiometry 273
Ca/Si ratio: determination in bulk concrete by PGNAA 9
Carbon
Measurement of 4.43MeV C γ-ray to determine calorific value of coal and effect of high iron content 419
Carbon dioxide
[^{15}O] CO_2: production and quality control for use in PET studies using a Cyclone 3D ^{15}O generator 403

Carbon monoxide
[^{15}O]CO: production and quality control for use in PET studies using a Cyclone 3D ^{15}O generator 403
CASTEM 2000
Use for modelling in radiotracer methodology 615
Cement
Measurement of U, Th and K concentrations 483
Cerium oxide
Use as target to produce carrier free Gd 1
Cesium
^{137}Cs
And ^{134}Cs body burden in man: determination by urinary excretion and differences between K and creatinine normalisation 505
Dating techniques to determine sedimentation in Lake Naini, India 97
Distribution in river sediments and coastal soil at Chittagong (Bangladesh) 747
Mapping low-level airborne contamination by γ-ray spectrometry 651
Spatial variability in small agricultural drainage basin in central Russia 341
Chromatography
LAOX column: use to separate traces of Th from large amounts of U 353
Cigarette
Egyptian: determination of heavy metals and rare earth elements by NAA 131
Cisplatin
^{191}Pt, ^{193m}Pt and ^{185m}Pt labelled: absorbed doses to patients 581
Coal
By-products from power plants: natural radioactivity 93
Measurement of calorific value: effect of high iron content on measurement of 4.43MeV C γ-rays 419
Quality control of seams by γ-ray transmission technique 269
Cobalt
^{60}Co uncalibrated source: use in HPGe detector efficiency calibration 323
Code
CASTEM 2000: use in radiotracer methodology 615
Computed tomography
Parallel beam γ-ray: projection map interpolation 717
Concrete
PGNA analysis to determine the Ca/Si ratio 9
Copper
Bihar mine: radon exhalation rate and U estimates in rock samples 107
^{62}Cu standardisation and determination of dose calibrator setting for ^{62}CuPTSM 515
Scatter fraction of x-ray beam: determination by experiment and Monte Carlo calculations 161
Voltammetry detection in high specific activity ^{64}Cu 15
Counting
Liquid scintillation
Computation of ionization quench factor in standardizations 183
To determine ^{222}Rn in water from health resorts in the Sudety mountains, Poland 475
Statistics: theory of overdispersion caused by fluctuating probabilities 565
Creatinine
Normalisation of ^{137}Cs in a single urine sample for body burden assessment 505
Critical angles
Of solid state nuclear track detectors: use to determine U and Th in geological samples 209
Curium
Detection limits in soil and vegetation after a nuclear accident 229

γ-Cyano-α-aminobutyric acid synthase
Use in synthesis of ^{11}C-methionine and its derivatives 285
Cyclotron
Short lived PET radionuclides: transport from facility to radiochemical laboratories 625

Dating
Of travertine from S. W. Turkey by ESR 689
Decay
Data of ^{153}Sm 169
Fluctuating probability: theory of overdispersion in counting statistics 565
Deconvolution techniques
Use for resolution enhancement of spectra of irradiated alanine 663
Use for resolution enhancement of spectra of irradiated unbound and silicone bound alanine 675
Detector
HPGe: efficiency calibration using activity calibrated and uncalibrated γ-ray sources 323
NaI: nonlinearity for PGNAA applications 189
Solid state CR39 and LR115 type II: use to determine U and Th in geological samples 209
1,2-Dipalmitoyl-3-IPPA
Radioiodination *via* a tributylin intermediate to produce ^{125}I-MIPAG 411
Distribution coefficients (K_d's)
Determination for Ra and Th on Dowex ion exchange resins 493
For use in risk assessment models of the Kara sea 121
Dose
Absorbed by patients from ^{191}Pt-, ^{193m}Pt- and ^{195m}Pt-cisplatin 581
β-: in a water phantom from a ^{186}Rh and ^{188}Rh wire source 543
Reconstruction for ^{90}Sr in bones and teeth of dogs: determination by EPR 151
Dosimetry
β-: in a water phantom from a ^{186}Re and ^{188}Re wire source 543
EPR: reconstruction of dose for ^{90}Sr in bones and teeth of dogs 151
Experimental determination of dose calibrator dial settings for ^{62}CuPTSM 515
Dysprosium
$^{150\text{-}153}$Dy: separation from $^{12}C^{6+}$ irradiated Nd_2O_3 27

EF1 and [^{18}F]EF1
Synthesis for use as hypoxia markers 643
Electroplating
Use to prepare U targets for ^{99}Mo production 499
Enzyme
γ-α-aminobutyric acid synthase: use in synthesis of ^{11}C labelled methionine 285
EPR
Dose reconstruction for bone-seeking ^{90}Sr in dogs 151
Escherichia coli
Labelling with ^{99m}Tc and bacterial viability 33
ESR
Powder spectrum of γ- and u.v.-irradiated unbound and silicone bound alanine: resolution enhancement 675
Properties of travertines from S. W. Turkey 729
Spectra of irradiated and thermally treated alanine free radicals: resolution enhancement 663
Use to determine the age of travertine from S. W. Turkey 689
Europium
^{146,147}Eu: production and separation from a $^{12}C^{6+}$ irradiated matrix 261

Excitation functions
For $^{100}Mo(p,2n)^{99m}Tc$, $^{100}Mo(p,pn)^{99}Mo$ and $^{99}Mo(p,\gamma)^{99m}Tc$ 69
For proton induced reactions on ^{100}Mo: ALICE predictions 177

Fallout
^{7}Be as a tracer in soil erosion investigations 599
Spatial variability of Chernobyl derived ^{137}Cs in a small agricultural area in central Russia 341
Fault
Geological: relation between soil-gas radon and different lithotectonic units, Garhwal, Himalaya 587
Ferric oxide
Hydrous: use in removal of Ba(II) and Sr(II) in radwaste management 359
Flow
Turbulent: radiotracer technique to determine concentration profiles 367
Fluid
Turbulent dispersion: study by a radioactive tracer technique using ^{24}Na 367
2-^{18}FDG
Preparation from 1,3,4,6 tetra acetyl-2-[^{18}F]FDG: stability towards epimerisation under alkaline conditions 37
6-[^{18}F]a L-DOPA
One-pot preparation: automated synthesis module 389
3-[^{18}F]-Fluoropropyl bromide
Preparation: re-evaluation of 3-bromopropyl triflate as precursor 293
[^{18}F]N-3-Fluoropropyl-2-β-carboxymethoxy-3-β(4'-methylphenyl)nortropane (FPCMT)
Radiosynthesis 299
Free radical
Alanine, u.v. and thermally treated: resolution enhancement of broadened spectra 663
From γ-ray and u.v. irradiated unbound and silicone bound alanine: resolution enhanced ESR spectra 675

Gadolinium
$^{147,149}Gd$ separation carrier free from irradiated CeO_2 target 1
Gamma ray
555.8keV emitted by ^{104m}Rh-^{104}Rh pair: re-evaluation of k_o and nuclear data for use in NAA 701
Source, activity calibrated and uncalibrated: use to determine HPGe detector efficiency 323
Transmission technique for quality control of coal seams 269
Very low activity sources in a spectrometric γ-γ probe for PBX and Zn grade determination in borehole logging 449
Gas
Flow mantles: radioactivity determination 609
Gold
$^{197}Au(n,2n)^{196m,g}Au$ reaction: measurement of isomeric cross sections using 14.5 MeV neutrons 81

Hypochlorite
Formation by α-radiolysis of concentrated brine solutions 637
Hypoxia markers
EF1 and [^{18}F]EF1: synthesis 643

Imaging
Quantitative by PET: patient studies with ^{52}Fe 707
X-ray: determination of scatter fractions of materials by experiment and Monte Carlo calculations 161

X-ray scintillators: SNR expressed as x-ray luminescence efficiency 59
Indium
$^{113}In(n,2n)^{112m,g}$ In reaction: measurement of isomeric cross sections using 14.5 Mev neutrons 81
Iodine
^{129}I
Determination in atmospheric samples by accelerator mass spectrometry 315
In radwastes by neutron activation 137
Ion exchange
Thorium adsorption behaviour on LAOX (mixed ammonium lanthanum tartrate) 21
Use in separation of Th, U, Pa, Ra and Ac from natural U and Th series 493
Use of hydrous ferric oxide in radwaste management 359
Ionizing radiation
Detection limits: theory of overdispersion in counting statistics caused by fluctuating probabilities 565
Iron
Characterization of blue and white porcelain using Mn/Fe ratio from EDXRF 279
Effect of high content in coal ash on measurement of 4.43MeV C γ-rays 419
^{52}Fe use in PET: quantification aspects of patient studies 707
^{55}Fe standardisation by $4\pi\beta$ liquid scintillation spectrometry method with ^{3}H standard efficiency tracing 85

K_0-factor
Re-evaluation for 555.8 keV γ-ray for ^{104m}Rh-^{104}Rh pair for use in NAA 701
Kaolin
Open pit in Zarów (Lower Silesia): uranium in mining waters 593

Lanthanum
La_2O_3 matrix, $^{12}C^{6+}$ irradiated: production and separation of carrier free $^{146,147}Eu$ 261
La_2O_3 matrix, ^{16}O irradiated: separation of carrier free 631
LAOX (mixed ammonium lanthanum oxalate)
Adsorption behaviour of thorium 21
Use as chromatographic column to separate traces of Th from U 353
Lead
Grade determination in borehole logging using very low activity sources in a γ-γ probe 449
^{210}Pb
Concentration in air at ground level by γ-ray spectrometry 239
Dating technique to determine sedimentation rate in Lake Naini, India 97
Lithotectonic units
Garhwal, Himalaya: relation with soil-gas radon variation 587
Logging
Tool using very low radioactivity for lead and zinc grade determination 449
Lucite
Scatter fraction of x-ray beam: determination by experiment and Monte Carlo calculation 161

Manganese
Characterization of blue and white porcelain using the Mn/Fe ratio from EDXRF 279
^{52m}Mn in PET: quantification of patient studies 707
Mantle
Gas flow: radioactivity determination 609
Marinelli beaker
Use in determination of U, Th and K concentrations in building materials 483

Mass attenuation coefficient
Of β^+ particles 217
Use to characterise phantom material 335*
Material
Tissue equivalent: Z-dependence of photon interactions 335*
Metal
Heavy: determination in Egyptian cigarettes by NAA 131
Methane
Use in target to improve the yield of ^{13}N-ammonia by proton irradiation of water 395
Methionine
^{11}C labelled: enzymatic synthesis with immobilised γ-cyano-α aminobutyric acid synthase 285
MIPAG
Radioiodination 411
Molybdenum
^{92}Mo(n,2n) ^{91m,g}Mo reaction: isomeric cross sections using 14.5 MeV neutrons 81
^{99}Mo
Accelerator production: ALICE predictions 177
Excitation functions for cyclotron production 69
Monte Carlo calculation
Use to determine scatter fractions of materials 161
Mordenite
Sorption of strontium: effect of cation concentration 527

Neodynium
$^{12}C^{6+}$ irradiated Nd_2O_3: separation of carrier free dysprosium and terbium isotopes 27
Neutron
Leakage spectra from spherical samples with a Pu-Be source 329
Start-up source: handling in a high temperature gas-cooled reactor 551
Nickel
^{63}Ni standardisation by $4\pi\beta$ liquid scintillation spectrometry 85
2-(2-Nitroimidazol-1[H]-yl)-N-(3-fluoropropyl)acetamide (EF-!)
Synthesis and ^{18}F labelling 643
Nuclear data
For 555.8 keV γ-ray emitted by ^{104m}Rh-^{104}Rh:re-evaluation for use in NAA 701
^{234m}Pa 1001 keV γ-line; application of fundamental parameter method for investigation of branching intensity 725
Impurity atoms beneath the surface of Cz-silicon: analysis by CPAA 533
[^{15}O]O_2 production and quality control from a Cyclone 3D ^{15}O generator for use in PET studies 403

Oxygen
Impurity atoms beneath the surface of Cz-silicon: analysis by CPAA 533

PET
Agent ^{62}Cu PTSM: determination of dose calibrator settings 515
Gas production: quality assurance using a Cyclone 3D ^{15}O generator 403
Quantification aspects of patient studies with ^{52}Fe 707
Radionuclides: long distance transport between cyclotron and radiochemical laboratories 625
Peumos boldus
Effect on labelling red blood cells and plasma proteins with ^{99m}Tc 145
PGNAA
NaI detector non-linearity 189

Phantom
Material: Z-dependence of photon interactions 335*
Water: dose distribution from a ^{186}Rh and ^{188}Rh wire source 443
[^{11}C]Phosgene
Use to prepare [^{11}C]-urea for synthesis of 2-[^{11}C]-thymidine 377
Phosphorus
In vivo measurement of Ca/P ratio in the radius by x-ray absorptiometry 273
Photon
Interactions in tissue equivalent materials: Z-dependence 335*
Platinum
^{198}Pt(n,2n) ^{197m,g}Pt reaction: isomeric cross section using 14.5 MeV neutrons 81
Plutonium
Detection limits in soil and vegetation after a nuclear accident 229
Pu-Be source: leakage neutron spectra from spherical samples 329
^{241}Pu content in forest soil from Poland 435
Polyethylene
Scatter fraction of x-ray beam: determination by experiment and Monte Carlo calculations 161
Polypropylene
Scatter fraction of x-ray beam: determination by experiment and Monte Carlo calculations 161
Porcelain
Blue and white from Xuande period(1426-35 AD): characterisation from Mn/Fe ratio from EDXRF 279
Potassium
Normalisation of ^{137}Cs urine excretion in a single sample in body burden assessment 505
^{40}K
Concentration in building materials 483
Determination in building materials used in Rawalpindi/Islamabad 559
Natural content in Indian building materials 93
Protactinium
^{234m}Pa 1001 keV γ-line; application of fundamental parameter method for investigation of branching intensity 725
Separation from natural Th and U series by ion exchange 493
Protein
Plasma :: effect of *Peumos boldus* on ^{99m}Tc labelling 145
Proton
Irradiation of water in production of [^{13}N]-ammonia 395

Quench factor (Q(E))
Computation in liquid scintillation counting standardisations 183

Radioactivity
Determination in gas-flow mantles from different manufacturers 609
Natural: determination in building materials by γ-ray spectrometry and INAA 559
Radioassay
Hybrid technique for multiple β-emitter mixtures using liquid and NaI(Tl) scintillation spectrometers 429
Radiolysis
Alpha- of concentrated NaCl solutions: spectroscopic investigation of formation of hypochlorite 637
Radionuclide
Distribution coefficients for use in risk assessment models of the Kara sea 121
Distribution in river sediments and coastal soils of Chittagong (Bangladesh) 747
PET: transport system for transfer from cyclotron to radiochemical laboratory 625

Radiopharmaceutical
^{188}Re labelled aminomethylene phosphonate derivatives: synthesis and stability 307
Radiotracer
Methodology: recent developments 615
Radium
^{226}Ra: natural content in Indian building materials 93
^{228}Ra; determination in gas flow mantles by γ-spectrometry 609
Separation from natural Th and U series by ion exchange 493
Radon
Exhalation rate from rock samples from Bihar U and Cu mines 107
Gas emanation from soil and rocks from different lithotectonic units in Garhwal, Himalaya 587
^{222}Rn
In groundwater: changes related to seismic activity 461
In water samples from health resorts in the Sudety mountains, Poland, by LSC 475
Radwaste see *Waste, radioactive* or *Waste, radwaste*
Rare earths
Source-sink determination in Egyptian cigarettes by NAA 131
Reactor
High-temperature gas cooled: handling of neutron start-up sources 551
Rhenium
[^{186}Re] Re-DMSA: preparation and biodistribution studies 43
[^{186}Re] Re-HEDP: preparation, stability studies and pharmacological behaviour 51
And ^{188}Re; distribution modelling in a neutron activated wire source and effect on β-dosimetry 543
^{188}Re generator produced: use to label aminomethylene phosphonate derivatives and their stability 307
Rhodium
^{104m}Rh-^{104}Rh pair: re-evaluation of k_o and nuclear data for 555.8keV γ-ray for use in NAA 701
Rock
Field γ-ray spectrometry to determine eTh/eU ratios on Vulcano island (Italy) 247
Radon concentration and U content in different lithotectonic units in Garhwal, Himalaya 587
Samples from Bihar U and Cu mines: radon exhalation rate and U estimation 107

Samarium
^{153}Sm: standardization and decay data 169
Sample
Atmospheric: determination of ^{129}I by accelerator mass spectrometry 315
Spherical with a Pu-Be source: leakage neutron spectra 329
Sand
Measurement of U, Th and K concentrations 483
Scandium
In a glass matrix: characterization and excitation behaviour 115
Scintillator
X-ray imaging: signal to noise ratio (SNR) determination by luminescence measurements 59
Sea
Kara: distribution coefficients for use in risk assessment models 121
Sediment
Of the Kara sea: distribution coefficients for use in risk assessment models 121
River: distribution of radionuclides at Chittagong (Bangladesh) and evaluation of radiation hazard 747
Sedimentation rate and pattern determination in L. Naini, India, by ^{210}Pb and ^{137}Cs dating dating techniques 97

Seismic activity
Relation of geochemical changes by studying ^{222}Rn content in groundwater 461
Selenium
^{82}Se(n,2n) ^{81m,g}Se reaction: measurement of isomeric cross sections using 14.5 MeV neutrons 81
Shell source method
Minimum biased for calibration of radwaste assay 255
Signal
Signal to noise ratio (SNR) of x-ray imaging scintillators: determination by luminescence measurements 59
Silicon
Ca/Si ratio: determination in bulk concrete samples by PGNAA 9
Czochralski substrates: analysis of oxygen impurity atoms beneath surface by CPAA 533
Sodium
^{24}Na; use as a radiotracer in study of turbulent dispersion of fluids 367
Sodium chloride
α-radiolysis: spectroscopic investigation of hypochlorite formation 637
Soil
Coastal at Chittagong (Bangladesh): distribution of radionuclides and radiation hazards 747
Erosion investigations: use of fallout ^{7}Be as a tracer 599
Forest, in Poland: ^{241}Pu content 435
Radon gas emanation: relation between different lithotectonic units, Garhwal, Himalaya 587
^{90}Sr,Pu,Am and Cm: detection limits shortly after a nuclear accident 229
Source
γ-ray, activity calibrated and uncalibrated: use to determine HPGe detector efficiency 323
Neutron start-up for a high temperature gas cooled reactor: handling 551
Pu-Be in a sphere: leakage neutron spectra 329
^{186}Re and ^{188}Re distribution in a neutron activated wire and effect of β-dosimetry in a water phantom 543
Spectra
ESR: resolution enhanced of u.v. and thermally treated alanine free radicals 663
Leakage neutron: from spherical samples with a Pu-Be source 329
Spectrometer
Liquid and NaI(Tl) scintillation: use for the radioassay of mixed β-emitters 429
Spectrometry
Accelerator mass: use in determination of ^{129}I in atmospheric samples 315
α- and γ: use to determine radioactivity in gas flow mantles 609
γ-γ probe using very low activity sources: optimization for Pb and Zn grade determination in borehole logging 449
γ-ray
Data: processing of low-level airborne contamination 651
Measurements on Vulcano island (Aeolian Arc, Italy) 247
Use to determine ^{210}Pb in air at ground level 239
Use to determine natural radioactivity in building materials in Rawalpindi/Islamabad 559
4πβ liquid scintillation: standardisation of ^{90}Sr, ^{63}Ni and ^{55}Fe with ^{3}H standard efficiency tracing 85
Spectroscopy
γ-ray for a radwaste system: a minimum biased shell source for calibration 255
Use to investigate hypochlorite formed by α - radiolysis of concentrated NaCl solutions 637
Stent
Endovascular,radioactive: production by implantation of ^{133}Xe ions 197
Strontium
Sorption on mordenite: effect of cation concentration 527
Sr(II) ions: removal from aqueous solutions by hydrous ferric oxide 359

^{90}Sr
Detection limits in soil and vegetation after a nuclear accident 229
Dose reconstruction for bones and teeth of dogs by EPR 151
Standardisation by $4\pi\beta$ liquid scintillation spectrometry with ^{3}H standard efficiency tracing 85

Target
CeO_2: charged particle activation to produce carrier free gadolinium 1
Uranium: preparation by electroplating 499
Water: use with methane gas in improved ^{13}N-ammonia production 395
Technetium
^{99m}Tc
Excitation functions for cyclotron production 69
Labelling of *E. coli*: effect on viability 33
Labelling of red blood cells and plasma proteins: effect of *Peumos boldus* 145
Teeth
EPR determination of doses due to ^{90}Sr in dogs 151
Terbium
$^{151,152}Tb$: carrier free separation from ^{16}O-irradiated lanthanum oxide matrix 631
$^{150-153}Tb$: separation from $^{12}C^{6+}$ irradiated Nd_2O_3 27
Thermoluminescence
Properties of travertines from S. W. Turkey 729
Thorium
Adsorption behaviour on mixed ammonium lanthanum oxalate LAOX 21
Concentration in building materials 483
Determination of content in geological samples using track detectors and nean critical angles 209
Determination of radioactivity from gas flow mantles by α-spectrometry 609
Separation from natural U and Th series by ion exchange 493
Separation of traces from large amounts of U on a LAOX column 353
^{232}Th
Determination in building materials used in Rawalpindi/Islamabad 559
Distribution in river sediment and coastal soil at Chittagong (Bangladesh) 747
Natural content in Indian building materials 93
2-[^{11}C]Thymidine
Automated synthesis using anhydrous [^{11}C]-urea 377
Tissue
Equivalent material: Z-dependence of photon cross sections 335*
Track
Detector: use in determination of U and Th in geological samples 209
Travertine
From S. W. Turkey
Dating by ESR 689
Thermoluminescent and ESR properties 729
Tributylin intermediate
Use in radioiodination of MIPAG 411
Tritium
^{3}H tracer: use in standardisation of ^{90}Sr, ^{63}Ni and ^{55}Fe by $4\pi\beta$ liquid scintillation spectrometry 85

Uranium
Concentration in building materials 483
Content in soil and rocks and relation between soil-gas radon variation in Garhwal, Himalaya 587
Determination of content in geological samples using track detectors and mean critical angles 209

Estimation in rock samples from Bihar U and Cu mines 107
Separation from natural Th and U series by ion exchange 493
Target: preparation by electroplating 499
^{234}U, ^{238}U and ^{235}U in raw waters in N. Spain 203
^{234}U and ^{238}U in mining waters of kaolin open pit in Zarow (Lower Silesia): determination and genetic remarks 593
^{238}U
Determination from branching intensity of 1001keV γ-line of ^{234}Pa 725
Determination in building materials used in Rawalpindi/Islamabad 559
Distribution in river sediment and coastal soil at Chittagong (Bangladesh) 747
[^{11}C]Urea
Anhydrous, derived from [^{11}C] phosgene: use to synthesise 2-[^{11}C]-thymidine 377
Urine
Excretion of ^{137}Cs for assessment of body burden in man: differences between K and creatinine normalisation 505

Vegetation
Pasture, shortly after a nuclear accident: ^{90}Sr, Pu, Am and Cm detection limits 229
Vessel
Transfer, for handling neutron start-up sources in a high temperature gas cooled reactor 551
Voltammetry
In cathodic stripping mode: use to measure ultra trace levels of Cu in high specific activity ^{64}Cu 15

Waste
Low-level radiation: analysis of ^{129}I by NA 137
Radioactive: use of hydrous ferric oxide to remove Ba(II) and Sr (II)) ions from aqueous solutions 359
Radwaste assay systems: minimum biased shell source for calibration 255
Water
Determination of ^{222}Rn in samples from health resorts in the Sudety mountains, Poland 475
Ground, $\delta^{18}O$ (H_2O) and ^{222}Rn: changes related to seismic activity 461
Mining waters in kaolin open pit (Lower Silesia): U determination 593
Surface, from the Bay of Biscay: uranium contents 203
Target using methane gas: use in improved production of ^{13}N-ammonia 395

Xenon
^{133}Xe ions: implantation to produce a radioactive coronary stent 197
X-ray
Absorptiometry: use for *in vivo* measurement of radius Ca/P ratio 273
EDXRF: use to characterise blue and white porcelains by the Mn/Fe ratio 279
Imaging: determination of scatter fractions of materials by experiment and Monte Carlo calculations 161
Imaging scintillators: SNR expressed as x-ray luminescence efficiency 59

Zinc
Grade determination in borehole logging using very low activity sources in a γ-γ probe 449
Zirconium
^{90}Zr(n,2n) ^{89m,g}Zr reaction: measurement of isomeric cross sections using 14.5 MeV neutrons 81

Applied Radiation and Isotopes
